

# quick setup

## 1 Connecting the keyboard

Plug the Tactile Pro 2.0 keyboard into your computer. For the keyboard and USB 2.0 dock to function, both USB plugs must be connected. If you do not require the use of the USB 2.0 dock, you may leave the gold-colored plug unconnected.

## Using the USB 2.0 dock

The USB 2.0 dock is recommended for connecting Hi-Speed USB devices (iPods, USB flash drives, digital cameras, etc.).

You may also use low-speed USB devices (mice, joysticks, etc.) with the USB 2.0 dock.

## Using the keyboard on computers with regular USB

The Tactile Pro 2.0 is also compatible with computers that only support regular USB, but your data transfer speeds through the USB 2.0 dock will be slower with regular USB.

If your computer has both USB 2.0 and regular USB ports, make sure that the gold-colored USB 2.0 dock connector is plugged into a USB 2.0 port, for faster data transfer.

## Using the Optimizer functions

- Optimizer commands are printed in *italics* on the top-right of each key.
- The **Optimize key** works just like Shift or Ctrl.
- **Hold down Optimize** and then press the key that has the command you want.
